Features

Get Bouncy, Shiny Curls in Minutes, Without Damaging, Burning, or Tangling!

The Spin Curler evenly distributes gentle heat from root to tip and does the curling for you! It adds body and shine to your hair while creating long-lasting, natural looking curls. You can also use the curling wand without the spin feature. Unlike conventional curling irons, it won't damage or dry out ends. The Spin Curler's ionic technology is actually good for your hair and all hair types, even damaged or chemically treated hair.

FAQ

- Q. What is the SPIN CURLER?**
A. The Spin Curler is a revolutionary ionic styling tool that automatically spins hair around a heated ceramic barrel to create curls.
- Q. What is ionic technology and how does it help?**
A. It's believed that hair can become positively charged due to damage, chemicals, and static electricity from dryness. A styling tool that uses a heated ceramic component produces negative ions to counter these problems. Tourmaline crystals amplify the effect. Negative ions balance the hair by infusing it with moisture from the air. The result is smooth, shiny, healthy-looking hair.
- Q. How does the SPIN CURLER work?**
A. Clamp a section of hair where you want the curl to begin. Let the spinning barrel create the curl to the end. The clamp will automatically release. Always follow the operating instructions.
- Q. Can I change the direction of the spin?**
A. Yes, you can change the rotation at the touch of a switch. It's comfortable for left- or right-handed users. You can also switch the rotation off and use the Spin Curler as a stationary ionic curling iron.
- Q. Can I control the temperature?**
A. Yes. The Spin Curler features 4 temperature settings designed to give optimum styling results on all hair types.
- Q. How will I know what temperature setting is right for my hair?**
A. Choose the setting for your hair according to the included instructions.
- Q. How will I know when the SPIN CURLER reaches the selected temperature?**
A. The red indicator light will blink until the selected temperature has been reached. The Heat Indicator Ring at the tip of the unit will change from purple to white when the barrel gets hot, and back to purple when the barrel gets cool.
- Q. I saw steam when I was using my SPIN CURLER. Does that mean something is wrong?**
A. No. This is common when the Spin Curler is used for the first time or if you have any styling products in your hair. The steam is not damaging your hair.
- Q. Do I use SPIN CURLER the same way I would a curling iron?**
A. You can switch the rotation off and use the Spin Curler as a stationary ionic curling iron to smooth or frizz your hair, relax natural curls, or create a flip hairstyle. However, the unit was designed specifically to create curls from crown to ends.
- Q. Can the SPIN CURLER be used on any hair types?**
A. Yes, the Spin Curler is great for hair of any thickness or texture, even colored or chemically treated hair. The Spin Curler's ionic moisturizing property is actually good for your hair.
- Q. My hair is very dry. Will the SPIN CURLER help?**
A. Yes, the Spin Curler's ionic technology will infuse moisture into the hair and can be used every day.
- Q. Will the SPIN CURLER work with short hair?**
A. Yes, the Spin Curler is great for adding height and volume to short hair styles.
- Q. Will the SPIN CURLER work with curly hair?**
A. Yes, the Spin Curler can smooth out your curls and give them moisture and shine.
- Q. Is the SPIN CURLER safe to use on my child's hair?**
A. Yes, the Spin Curler is safe to use on children's hair. Please read the instruction manual and follow normal safety procedures as you would with any other appliance.
- Q. Is the SPIN CURLER safe to use with hair extensions?**
A. The Spin Curler is safe to use with extensions that are made of human hair.
- Q. Can the SPIN CURLER be used on wet hair?**
A. No. For best results, the Spin Curler should only be used on dry hair.
- Q. Can I touch the SPIN CURLER barrel when styling?**
A. The barrel can reach a temperature of up to 430°F, depending upon the setting selected. There is no need to touch the barrel as the unit was designed for easy, one-hand operation and automatic clamp release.
- Q. How long should I keep the SPIN CURLER in my hair to curl it?**
A. After the entire hair section has been wrapped, hold for 3 to 5 seconds to set the curl. Then rotate once more and the curl will release automatically. You can also press on the clamp lever to release the hair and then slide the barrel out.
- Q. How long does it take for the SPIN CURLER to heat up?**
A. The Spin Curler takes approximately 2 minutes to reach the desired temperature.
- Q. I left my SPIN CURLER on and noticed it went off by itself.**
A. The Spin Curler will shut off automatically after one hour. Simply turn the unit back on to continue using.
- Q. Can I carry my SPIN CURLER to other countries?**
A. The Spin Curler can be plugged into any 120/240V AC electrical outlet. For use in several countries overseas and for connection to 240V supply, use an attachment plug adapter of the proper configuration for the power supply receptacle. Confirm the voltage at each overseas location before using the appliance.
- Q. What's the 60 day money back guarantee for buying the SPIN CURLER?**
A. If, within 60 days of your purchase, you are not satisfied with the Spin Curler's performance, you can return the product to us for a refund.
